

CL

Fluid end Stainless Steel AISI 303

EN

- › Pump body: anodized aluminium alloy
- › Symmetric crankcase featuring top and bottom fixing for easy right to left shaft conversion
- › Head: stainless steel
- › Camshaft: steel
- › Splash lubrication
- › Shaft support bearings oversized for long duration
- › Connecting rods: special anti-friction light alloy
- › Guiding piston: stainless steel
- › Solid ceramic plungers
- › Suction/delivery valves in rilsan
- › Seals: high dependability
- › Versions in direct drive mount with shaft positionable on the right or left or through shaft.

ES

- › Cuerpo bomba : en aleación de aluminio anodizado
- › Cáster simétrico dotado de fijaciones superiores e inferiores para saliente eje derecho o izquierdo
- › Culata : en acero inoxidable
- › Eje de excéntricas: en acero estampado
- › Lubricación por barboteo
- › Rodamientos de soporte eje de grandes dimensiones para una larga duración
- › Bielas: en aleación ligera especial antifricción
- › Pistones de guía: en acero inoxidable
- › Pistones sumergidos: completamente en cerámica
- › Válvulas de aspiración/impulsión en Rilsan
- › Juntas: de gran fiabilidad
- › Versiones en toma directa con eje configurable a la izda. o dcha., o cigüeñal pasante.

DE

- › Pumpengehäuse aus eloxierter Aluminiumlegierung
- › Symmetrisches Gehäuse mit Befestigungen oben und unten für Überstand rechte oder linke Welle
- › Zylinderkopf aus Edelstahl
- › Nockenwelle aus Stahl
- › Schüttelschmierung
- › Großzügig bemessene Wellenstützlager
- › Kolbenstangen aus spezieller reibungsloser Leichtlegierung
- › Führungskolben aus Edelstahl
- › Plungerkolben ganz aus Keramik
- › Ansaug- und Auslassventile aus Rilsan
- › Sehr zuverlässige Dichtungen
- › Ausführungen mit Direktantrieb, mit Welle rechts oder links konfigurierbar, oder durchgehende Welle.

IT

- › Corpo pompa in lega d'alluminio anodizzato
- › Carter simmetrico dotato di fissaggi sopra e sotto per sporgenza albero destra o sinistra
- › Testata in acciaio inox
- › Albero ad eccentrici in acciaio
- › Lubrificazione a sbattimento
- › Cuscinetti di supporto albero ampiamente sovradimensionati per una lunga durata
- › Bielle in speciale lega leggera antifrizione
- › Pistone di guida in acciaio inox
- › Pistoni tuffanti in ceramica integrale
- › Valvole aspirazione mandata in rilsan
- › Guarnizioni ad alta affidabilità
- › Versioni in presa diretta con albero configurabile a sx o dx, o albero passante.

FR

- › Corps de pompe : en alliage d'aluminium anodisé
- › Carter symétrique équipé de fixations au-dessus et au-dessous pour saillie du vilebrequin à droite ou à gauche
- › Tête : en acier inox
- › Arbre à cames: en acier
- › Lubrification par barbotage
- › Les paliers guidant le vilebrequin sont largement dimensionnés afin de permettre une durée de service accrue
- › Bielles : en alliage léger spécial anti-frottement
- › Piston de guidage: en acier inox
- › Pistons plongeurs : intégraux en céramique
- › Clapets d'aspiration et refoulement en rilsan
- › Garnitures: haute fiabilité
- › Versions à prise directe avec vilebrequin configurable à gauche ou à droite, ou passant.

Routine maintenance includes easy operations such as: oil check & change, check and possible replacement of seals.

El mantenimiento ordinario incluye operaciones simples, como el control y cambio de aceite, el control y, si es el caso, la sustitución de las juntas.

Die ordentliche Wartung umfasst einfache Vorgänge wie Ölkontrolle und -wechsel, Kontrolle und eventuelles Ersetzen der Dichtungen.

La manutenzione ordinaria comprende semplici operazioni quali, controllo e cambio olio, controllo ed eventuale sostituzione guarnizioni.

L'entretien courant comprend de simples opérations telles que le contrôle et la vidange de l'huile, le contrôle et la substitution éventuelle des garnitures.
